SUNNY YOGENDRA SHARMA

Full-Stack Software Engineer · AI Products

Phone: +91 84338 98723 · Email: sunny.sharma.syn@gmail.com
LinkedIn: linkedin.com/in/sunny-sharma1409 · GitHub: github.com/the-Sunny-Sharma
Portfolio: the-sunny-sharma.vercel.app · Mumbai, Maharashtra (Open to Relocation)

Professional Summary

Full-Stack Software Engineer building AI-powered products end to end with **Python/FastAPI**, **Java/Spring Boot**, **PostgreSQL** and **React**. **Full-Stack Developer Intern at Namaah Pvt. Ltd.** and sole developer of two production modules of Atlas, an AI film-production platform (**190+ REST endpoints**). Integrates **LLM and generative-media APIs** (OpenAI GPT-4o, fal.ai, Anthropic Claude, Google Gemini) into live products; merged open-source PR in TheAlgorithms/Java (66k stars). Seeking full-time Full-Stack / AI Product Engineering roles from **Dec 2026**.

Experience

Full-Stack Developer Intern Jun 2026 – Present

Namaah Pvt. Ltd. (AI startup) · Remote · Product: Atlas, an AI film-production platform
FastAPI · SQLAlchemy · PostgreSQL · React · Zustand · WebCodecs · FFmpeg · fal.ai · OpenAI · Cloudflare R2

- Single-handedly built **Slate**, a Frame.io-style review & production workspace: **30-table PostgreSQL** schema, **115 FastAPI endpoints**, two-tier role-based access control and the full React frontend (50K+ lines).
- Built frame-accurate video review: SMPTE timecodes, threaded time-ranged comments with on-frame annotations and voice/screen recordings, versioned approvals, and an **FFmpeg** 1080p/720p/480p rendition ladder.
- Secured sharing with **PBKDF2**-hashed password links, expiry and download controls; added email invites with delivery tracking, notifications, an activity log, and calendar and workload views.
- Designed and built the **Storyboard Studio** solo (76 endpoints): script to shots, batch AI frame generation via **fal.ai**, a multi-track animatic timeline, and **in-browser MP4 export** (WebCodecs + mp4-muxer).
- Shipped an audio-AI pipeline (TTS, dialogue, music, lip-sync) and Script AI on fal any-llm with **automatic OpenAI fallback**, tracked in a jobs panel with live ETAs; added a story bible for consistent characters.
- Enhanced the timeline video editor: **GPT-4o Vision** gap-fill prompts from adjacent frames, faster cold loads (split fetches, server-side waveforms, caching; pytest), and an upload queue with pause/cancel/retry.

Full-Stack Developer (Independent) Feb 2025 – May 2026

Self-Directed Engineering — Production Projects, Open Source & Certifications · Mumbai, MH

- Designed and shipped production-grade full-stack applications with **Java 21, Spring Boot**, Spring Data JPA, REST APIs, MySQL/PostgreSQL, React.js and Docker; built async event pipelines with **Apache Kafka** and Redis queues.

Full-Stack JavaScript Intern Dec 2023 – Jan 2024

Mira Advanced Engineering · Thane, Maharashtra

- Delivered one production-ready **MERN** project per week under Agile sprint conditions — Airline Management System and Employee Management System using JWT auth, RBAC, MongoDB/MySQL hybrid storage.
- Built Express.js REST APIs with input validation, error handling and RBAC; presented working demos weekly.

Technical Skills

Languages: Java 21 (multithreading, concurrency, OOP), Python, JavaScript, TypeScript, SQL, HTML5, CSS3

Backend: FastAPI, Spring Boot (MVC, Data JPA, Security, Batch), SQLAlchemy, Hibernate ORM, Node.js, Express.js, REST APIs, WebSockets, Microservices, Background Job Queues

Frontend: React.js (hooks, Context API, Redux, Zustand), Next.js, Vite, Tailwind CSS, TanStack Query

AI & Media: OpenAI (GPT-4o Vision), fal.ai (image, video, audio, any-llm), Anthropic Claude API, Google Gemini API, Spring AI, Prompt Engineering, WebCodecs, Web Audio API, FFmpeg

Databases: PostgreSQL, MySQL, MongoDB, Redis, Firebase, Oracle — Alembic & Flyway migrations

DevOps & Cloud: Docker, Docker Compose, GitHub Actions CI/CD, Railway, Cloudflare (Pages, R2), Vercel, Render, Nginx, Maven, OpenAPI/Swagger, Postman, Git, Linux; Kubernetes & AWS (familiar)

Testing: pytest, Vitest, JUnit 5, Mockito, Jest, React Testing Library, SonarQube

Concepts: OOP, SOLID, Design Patterns, System Design, Distributed Systems, Performance Tuning, Agile/Scrum

Projects

Job Board Application Apr 2026

Java 21 · Spring Boot · Spring Security · Spring Data JPA · React.js · MySQL · Docker
github.com/the-Sunny-Sharma/job-board-application · job-board-syn.vercel.app

- React.js + Spring Boot REST API with Spring Security + JWT stateless auth, RBAC (ADMIN/CANDIDATE) and global exception handling; **Anthropic Claude via Spring AI** for resume-to-job matching.
- JPA Specification API for dynamic multi-parameter filtering on MySQL; Cloudinary uploads, JavaMailSender notifications, Docker Compose deployment, GitHub Actions CI/CD on Render.

TraderOS — FinTech Tax Platform May 2026 (In Dev)

Java 21 · Spring Boot · Spring Batch · Apache Kafka · PostgreSQL · Redis · FastAPI · React.js · Docker
github.com/the-Sunny-Sharma/traderOS

- Polyglot microservices: Spring Boot API with Spring Batch + Redis job queue and **Apache Kafka** event streaming, PostgreSQL with Flyway migrations; Python FastAPI microservice parses multi-broker financial XLSX data.
- React.js SPA (TanStack Query async polling); **Google Gemini API** for plain-language tax explanations; iText 7 PDF export; OpenAPI/Swagger docs; full stack on Docker Compose.

Codenest — EdTech Platform Jan 2025

Next.js · TypeScript · Node.js · Socket.IO · WebRTC · MongoDB · Redis · Nginx
github.com/the-Sunny-Sharma/codenest-ucoe

- Microservice architecture with API Gateway (NextAuth v5); **Socket.IO** real-time collaborative Monaco Editor with conflict resolution; Redis-queued code execution via Judge0; Cashfree payments; Mux + HLS.js live streaming.
- **Sub-100ms WebRTC latency** across 50+ concurrent users via Nginx; 98.9% uptime and 0.8% error rate across 1,000 test actions.

Open Source Contributions

TheAlgorithms/Java (66k stars) — PR #7418, merged May 2026

Java 21 · JUnit 5 · DSA

- Rat in a Maze (DFS backtracking, visited matrix, full Javadoc, IllegalArgumentException validation); 12 JUnit 5 unit tests — 100% edge-case coverage.

nanotaboada/java.samples.spring.boot — PR #329, in review May 2026

Spring Boot 4 · JDK 25 · OpenAPI/Swagger

- PATCH endpoint per RFC 7396 with JSR-380 Bean Validation, @Valid, full OpenAPI/Swagger docs; 45 tests passing, SonarQube quality gate passed.

Education

B.E. in Information Technology — CGPA: 8.19 / 10 Jun 2021 – May 2025

Universal College of Engineering, University of Mumbai · Mumbai, Maharashtra

- Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP, Design Patterns, Multithreading & Concurrency

Certifications & Achievements

- **Java, Spring Boot, Docker & Microservices** — Telusko / Udemy [Certificate]
- **Full-Stack Web Development (MERN)** — Kamal Sir [Certificate]
- **SQL Intermediate** — HackerRank [Certificate]
- **JPMorganChase Software Engineering Simulation** — Forage (Kafka, JPA, REST, Maven) [Certificate]
- **Finalist — InnovateYou Teachathon 2023** — National Hackathon, Pune — Top team from 200+ nationally
- **CSI Member** — Certified in Cybersecurity & Drone Awareness workshops
